## WORK EXPERIENCE

**Electronic Technician**  —  Formosa, Argentina
*DControl*  —  *Mar 2021 – Sep 2021*

- Implemented state-of-the-art surveillance and security systems.

## PROJECTS

**CV Manager** | 

- This web application was created to help recruiters and that they can facilitate and expedite the hiring of candidates for a job position.
- At the moment it is a monorepo that anyone can use freely.
- The app uses MERN Stack and Brain.js for machine learning.

**Homebanking App Web** | 

- An entire home-banking app.
- I designed the frontend page and the backend, database, while co-working with mates in the business logic. We alsodeveloped a CRUD for employees.
- A great project we use technologies like, html, css, bootstrap, javascript, django and django rest framework.

## SKILLS
